Luxury Cover Letter Guide

A persuasive narrative that complements your resume

The 3-Paragraph Arc

Hook, proof, and ask. Open with a specific achievement, connect it to the target role, and close with a clear, confident invitation to continue the conversation.

Tone Matching

Write the way the company speaks. A startup wants energy and ownership; an enterprise wants precision and risk management. Adjust your register accordingly.

No Resume Repeat

The letter is your chance to add context the resume cannot — motivation, fit, and the story behind your transition. Never simply restate bullet points.
