Luxury Resume Templates

ATS-optimized premium layouts for senior professionals

Project-First Layout

Open with measurable outcomes, not duties. Lead each role with the result you produced, then the actions that delivered it. Recruiters scan the top third of a resume in seconds.

Keyword Alignment

Mirror the language of the job description honestly. Match the title, tools, and certifications that the posting lists so the ATS ranks your profile against the role.

One-Page Discipline

Every line must earn its place. Use 10-12pt typography, a clean two-column grid, and generous white space for a premium, scannable finish.
